Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25, drawn to a method of flowing specimen fluid and a flow cell device for examining specimen fluid flowing with sheath fluid comprising a housing defining a hollow fluid passage, a cannula, a first direct flow control pump, a second direct flow control pump, and a measurement device, classified in class 356, subclass 244.
- II. Claims 26-28, drawn to a method forming a cannula from a hollow tube having first and second ends and a first cross-section shape, drawn to 417, subclass 476.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the patentability of the combination does not rely on the details of the subcombination. The subcombination has separate utility such as measuring light transmission or absorption and scattering light device.

Art Unit: 2877

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Alan Limbach on July 22, 2004, 2004 to request an oral election to the above restriction requirement. Applicant's election without traverse of Group I (claims 1-25) in the reply [REDACTED] on July 22, 2004 is acknowledged and Applicant agreed to cancel non-election claims 26-26.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Art Unit: 2877

Authorization for this examiner's amendment was given in a telephone interview with Mr. Alan Limbach on July 22, 2004.

The application has been amended as follows: **Claims 26-28 have been canceled.**

Claims 1-25 are allowed.

The following is an examiner's statement of reasons for allowance:

As to independent claims 1 and 14, the prior art of record, taken alone or in combination, fails discloses or render obvious a method and a flow cell for examining specimen fluid flowing with sheath fluid comprising all the specific elements with the specific combination including of a first direct flow control pump for pumping the sheath fluid through the fluid passage such that the sheath fluid has a first known velocity at the injection point, a second direct flow control pump for pumping the specimen fluid through the cannula such that the specimen fluid is injected into the fluid passage by the cannula output end as a stream of the specimen fluid having a second known velocity at the injection point, and a measurement device for measuring a parameter of specimen fluid stream passing through the examination area in combination with the rest of the limitation of claims 1 and 14.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
